Tapping My Inner “Futurist”?

# Foresight 101: Cone of Plausibility

Multiple Outcomes, Multiple Time Horizons

A close-up photograph of a person's hand holding a small, rectangular white paper strip against a dark background. The strip contains two lines of black text. The hand is visible on the left side, with the thumb and index finger gripping the edge of the paper. The lighting is focused on the paper, making the text stand out clearly.

You will have regulatory  
certainty for years to come.

IF YOU HIT THIS SIGN  
YOU WILL HIT THAT BRIDGE

WAIT FOR IT

# Key Elements Driving Consumerization? Entrepreneurial Spirit for Energy Solutions

**KICKSTARTER**

SunPort™ – Demand Solar. Anywhere. Instantly.

Join the movement to crowdsource demand for solar energy, just by plugging in.

[Pre-order Here](#)

Created by

Paul Droege

---

**1,676 backers** pledged \$120,599 to help bring this project to life.

Key Element Driving Consumerization:

## Lower Barriers to Entry for Innovation + Adoption

- How do we interface with energy entrepreneurs and branded solutions?
- How do we guide our communities in making decisions on solutions?
- How do we learn from our community members who are early adopters?

*Blurring of Digital-Physical Boundaries*

# ***Battery-powered vents to control temperature in individual rooms***

[SMART VENT](#) [ABOUT](#) [NEWS](#) [FAQ](#)

[PRE-ORDER NOW](#)

PRE-ORDER YOUR SMART VENT SYSTEM BY 7/28/2015 FOR UP TO 25% OFF

## MEET YOUR SMART VENT

Now you can heat and cool your home the intelligent and efficient way—room by room.

Smart-home heating startup Ecovent lands \$6.9M investment, touts \$1M in pre-orders

Key Element Driving Consumerization:

## How might Connected Devices transform Expectations?

The image shows a screenshot of the 'notion' website. The navigation bar includes links for 'How it Works', 'Technology', and 'Support', along with a 'Pre-Order Now' button. The main content area features a large image of a person's hands working with plumbing pipes. Overlaid on this image is the text 'Home awareness, simplified.' and 'Monitor your home with a single sensor, wherever you are.' Below this text are two buttons: 'Pre-order now' and 'Watch video'.

Integration of Products:

**Security, Plumbing, Indoor Air Quality**

## Strategic Assumption: Elevated Expectations Ahead

**Eventually 'Connected Homes' solutions will not seem silly (or expensive)**

*How might we deliver innovative managed services for 'connected devices' solutions?*

- Partnerships*
- Pilots*
- Crowdfunding promotion?*
- Niche Demands*  
*(e.g. aging populations)*

## How do we think of Behavior Change to Guide Outcomes?

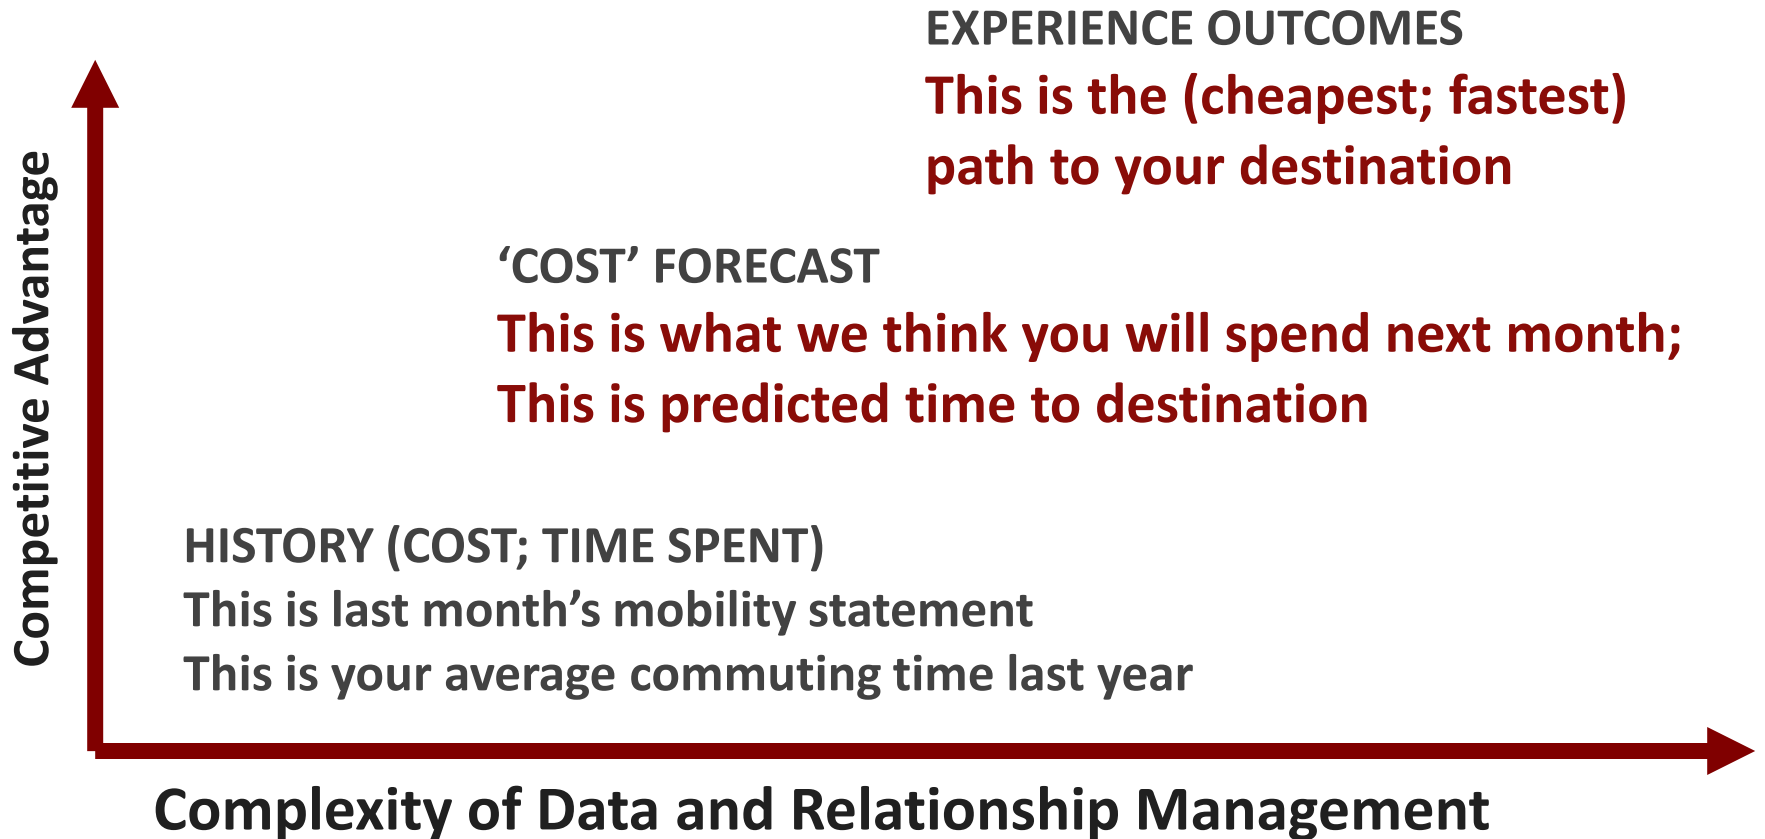

Social Norms + Slow Embrace of Prescriptive Analytics

## ***Guided Financial Experiences***

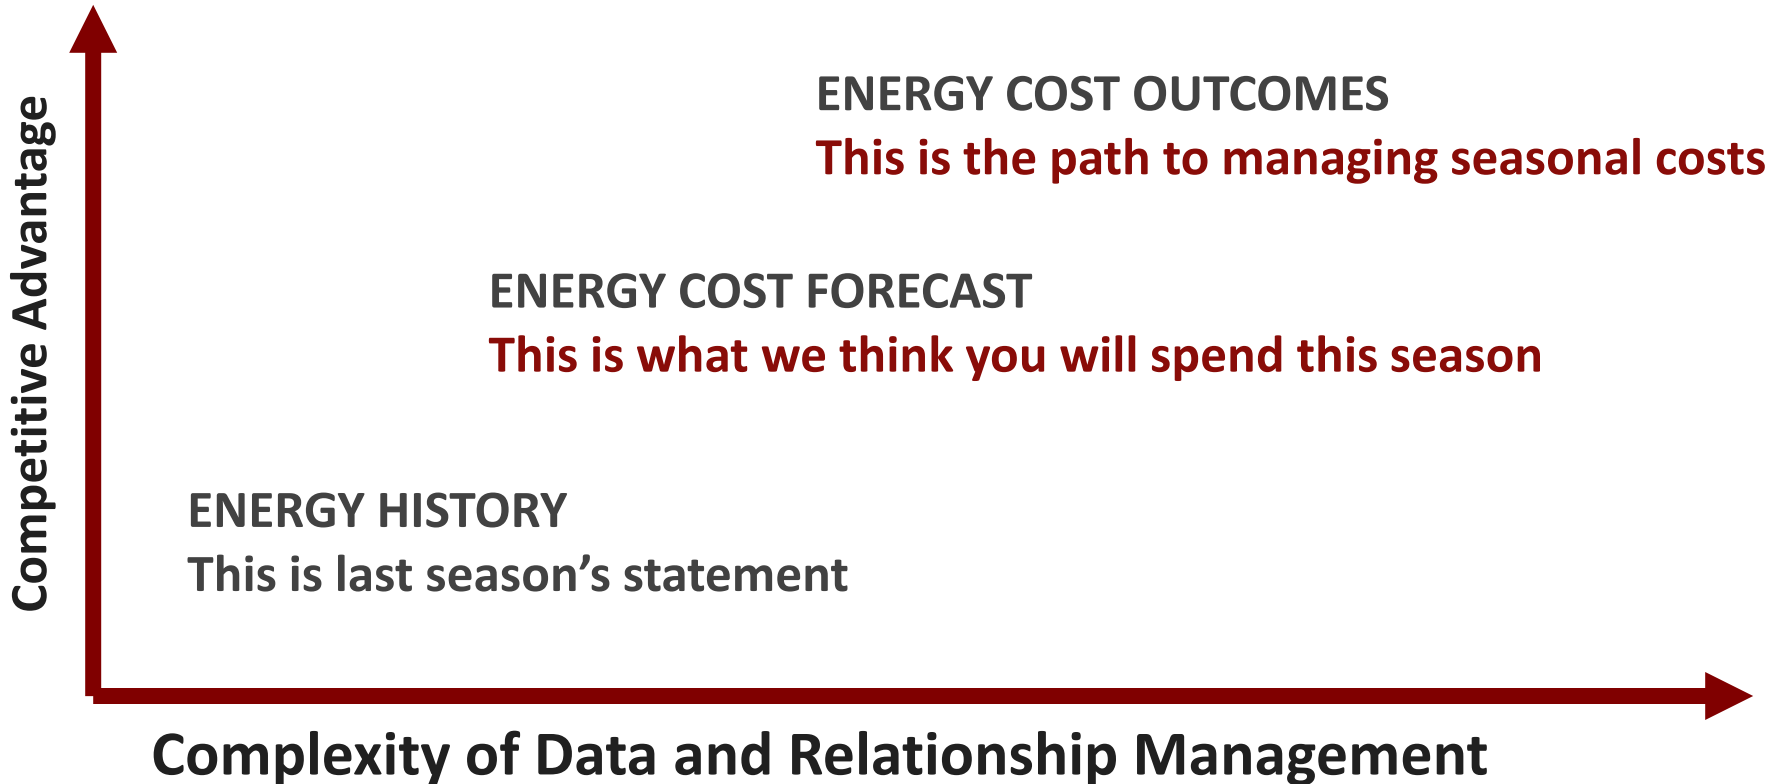

# Guided Transportation Experiences

Social Norms + Slow Embrace of Prescriptive Analytics

## Guided Utilities Experiences ?

IoT Consumerization

**Question #1:**

**What outcomes matter?**

- Comfort
- Informed Decision making
- Reliability (Uptime)
- Increased Savings
- ROI for Distributed Systems
- Fixed Costs
- Lower Carbon Footprint
- Worry-Free (Bill Management)

IoT Consumerization

## Question #2:

How might we (or other players) scale and deliver prescriptive analytics of energy management experiences?

**Signals of Change**

# **Policy + Consumer-driven Dynamics of Rooftop Solar**

## Signals of Change

# Distributed (Centrally Controllable) *Behind-the-Meter* Storage

## Signals of Change

# Utilities Coordinate Aggregated System level Solutions

"Community Storage" is an emerging term for programs that aggregate distributed energy storage resources that are located throughout a community, such as water heaters, electric vehicles, and interconnected storage batteries, to improve the operational efficiency of electric energy services to consumers.

## The Community Storage Initiative

[Join Our Email List](#)

### The co-founders of the community storage initiative ask for your support:

- Click on the link above to join the Initiative's email list to receive information about the Initiative and upcoming events
- Promote an "above the baseline" approach to electric water heating, electric vehicle charging, and residential battery use marketed as "Community Storage"
- Share your business model and best practices around "Community Storage"

### We ask you to follow the Guiding Principles of The Community Storage Initiative:

1. Voluntary Participation (by the utility, home, business or individual)
2. Education & Training (information resources, program templates, quick-start guides, etc.)
3. Market Acceptance (locally, regionally and nationally)

## Signals of Change

# New types of Exchanges, Networks and Marketplaces

### MAP OF RENEWABLE PROJECTS

Renewable projects are happening around the world. Here's a glimpse of a few in your backyard.

- Solar
- Hydro
- Wind
- Other

## Signals of Change

# Testing Viability of Peer-to-Peer Energy Trading (via Blockchain)

## Transact locally with neighbors

TransActive Grid enables residents with smart meters to transact with neighbors using existing grid infrastructure.

It includes a hardware layer of smart meters and a software layer using the blockchain and smart contracts. These are self-enforcing contracts that can provide an auditable, non-repudiable and cryptographically secure history of automated transactions. The current prototype uses the [Ethereum blockchain](#).

## Solutions for North Carolina Energy Prosumers?

### *Low by MW, but Growing, Visible and Personal*

*Over the past 5 year, net energy – that is energy fed into the grid by consumers – has grown on average at 500 percent per annum while net utility generation grew at 1.2percent*

## Signals of Change (Despite Lingering Scars)

# Fuel Cell based Renewable Integration and Micro Grid Foundation

Bloomenergy

DOOSAN

## Distributed Driven by: Cost/Capital, Resilience & Control

**33%**  
**LESS**  
Up-Front Cost

**15%**  
**LESS**  
CO<sub>2</sub> Emissions

### **NATURAL GAS FUEL CELLS**

Big enough to power a large retail facility onsite, a scaled-up version based on PNNL's fuel cell design could cost less to build and emit fewer greenhouse gases than a natural gas combined cycle power plant.

The PNNL study showed that for the same power output, a natural gas solid oxide fuel cell would cost almost one-third less to build than a centralized natural gas combined cycle plant.

## GE Enters Market in 2018 (1MW – 10MW)

# Distributed Scenario: Solar Fails to Scale vs Energy Appliances

## Bloomberg Businessweek

■ Toho Gas units for an "ene-farm" household fuel cell system sit outside a smart home developed by Toyota in Toyota City, Japan, on Oct. 17, 2014. Photographer: Kiyoshi Ota/Bloomberg

Redox Power Plans To Roll Out Dishwasher-Sized Fuel Cells That Cost 90% Less Than Currently Available Fuel Cells

## Plausible Paths:

- 1) Subsidies & cost reductions = Viable Products
- 2) Localized MW Power Parks = Utility Micro Grids
- 3) NatGas + DG Managed Service = Clean Energy as Service

Scenario to Explore

## What if our Communities Embrace Natgas + Distributed Generation?
